ANNUAL REPORT

OF THE

REGISTRAR

1966-67

This report follows patterns, a number of which have been followed for many years. It is issued largely for local use and much of its material is not printed in any other report.

The summaries below are based on head counts. Even though the enrollment has increased significantly each session during the past year, the total head counts did not increase materially. This says that students enrolled for more sessions as opposed to more students enrolling for one or two sessions. This is particularly true of students during the summer of 1964, almost half of whom were enrolled during the following fall or spring semesters. Only a few years ago the usual pattern was that about 20% of the summer students enrolled during the following academic year. It thus appears that in a rather significant way we are having an increase in the number of students attending college around the calendar. This was one of the goals of the revision in the summer session plans, in order to secure a more efficient use of facilities.

FULL-TIME EQUIVALENCY ENROLLMENT

Computation is based upon an agreement between the three state universities and the State Auditor's Office. The total hours for which all students are enrolled at the end of the third week of each semester, or session, are determined. These are added together to determine the total hours for the year. Undergraduate hours are divided by 32 and graduate hours by 20 to determine a so-called full-time equivalent.
